Portfolio @ www.jvscott.net

Skills

- End-to-end architecture and development in Agile teams
- Technical expertise in front- and back-end web technologies
- Independence that enables passionate ownership
- Leadership and communication with varied audiences

Education

Simon Fraser University

2005 - 2010

BSc in Computing Science with a
focus in computational geometry

Employment

Developer Analyst - TELUS

July 2011 – Present

- Planned and executed a 6 month redesign of telus.com's search
- Reported to our VP directly to recommend strategy and technologies
- Designed and programmed a Java/REST solution in a large codebase
- Implemented and supported the full stack for various MVC applications
- Developed with jQuery, CSS3, Ruby/Rails, PHP, NodeJS, and NoSQL
- Drove innovation and improvement, such as creating a company-wide UI Toolkit that resulted in more usable applications in less time
- Educated teams on Rails' testing framework, TDD, and Scrum

Game Developer - Self Employed

December 2010 – June 2011

- Designed and finished a commercial game, Icarus (icarus.jvscott.net)
- Recruited and organized a small team to deliver my idea in 7 months
- Marketed and publicized the game, resulting in hundreds of downloads

Ruby on Rails Projects

- | | | |
|------|-------------------------|--|
| 2012 | Habitat Videos | Owned search for internal video and picture hosting |
| 2011 | Filedrop | Refactored an internal file-sharing site |
| 2008 | Partnerpedia.com | A social networking site for businesses, at the time |
